

AFR SECURE TACTICAL RADIO (Leslie)

DESCRIPTION OF EFFORT

Replaces secure tactical radios used for AFRC deployed missions. Requirement is based on new UTC taskings and replacement of unrepairable equipment. New multi-band radio (PRC-148) is compact, user programmable, with 30-512 Mhz continuous range, and will be interoperable with the next generation JTRS model.

QUICK LOOK SCHEDULE

△	Task Name	FY2001				FY2002			
		Q1	Q2	Q3	Q4	Q1	Q2	Q3	Q4
	oblige via GSA or USSOCOM				△				
	Estimated delivery (5 sets)						△		
	Receive FY02 funds					△			
	oblige via GSA or USSOCOM							△	
	Estimated delivery (41 sets)								
	Receive FY03 funds								
	oblige via GSA or USSOCOM								

ISSUES

- Active duty radios were replaced in the 1990's leaving AFRC with unsupportable Scope Shield I radios
- Restrictions on new procurement has created a \$10.5M backlog requirement
- JTRS will not be produced until FY06 or FY07

ACTION ITEMS

- Next order with FY01 funds was coord through the IPT. SC/CE have agreed to exchange mbitrs for SSIIIs to meet CE readiness requirements
- Depot will press JTRS SPO to approve MBITR as a substitute until FY05
